DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed March 14, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Specification

2. The abstract of the disclosure is objected to because the formatting of the contents is improper and therefore confusing. Applicants are advised to use the content of instant claim 1 to replace the abstract. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 5 and 9-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a catalyst composition comprising a transition metal catalyst component and a cocatalyst represented by formula (I), does not reasonably provide enablement for a catalyst composition comprising the cocatalyst represented by formula (I) as the only essential component. The specification does not

Art Unit: 1713

enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The main catalyst component (the transition metal containing component) should be included in those claims. Furthermore, neither the monomer or polymer is specified in claim 9, without specifying the monomer or the polymer, the polymerization process can not be practiced.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. For example plural forms such as "compounds", "components" and "catalyst systems" should be avoid in claims unless two or more of those compounds and systems are required claimed limitations. Applicants' attention is also directed to the following informalities of the claims.

Art Unit: 1713

In claim 8, It is not clear that the term "which" of line 4 refers to the transition metal compound alone or both of the transition metal compound and cocatalyst represented by formula (I). clarification is requested.

Claims 3 and 4 provide for the use of the compound of formula (I), but, since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 3 and 4 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).
